EVOLVE™ FAQs

What is Evolve™ Rodent Birth Control?
Evolve™ Rodent Birth Control is a soft bait contraceptive developed for rats. It restricts rodent reproduction without harming them or other animals.

How does Evolve™ work?
Evolve™ is formulated to reduce fertility in rats based on their weight and metabolism using Cottonseed Oil as the active ingredient. Cottonseed oil has been used for fertility control since the 1970s.

Where can Evolve™ be deployed?
Evolve™ soft baits can be used anywhere rodents are found! Simply place 2 to 12 pieces per location and update based on rodent activity levels.

When can I expect results with Evolve™ Rodent Birth Control?
Evolve™ Rodent Birth Control effect on the population begins after 1-2 breeding cycles (4 to 6 weeks), resulting in reduced pregnancies and less pups born.

How will I know Evolve™ Rodent Birth Control is working?
When using Evolve™ you will see less evidence of rodents (droppings and nesting), less damage to property, less activity and less bait consumption.

Why use Evolve™?
Evolve™ rat soft bait restricts rodent reproduction without the use of lethal methods or poisons. They are highly palatable to rats, easy to use and offer diverse deployment in many different environments.

Can I use it with traps or lethal methods?
Although Evolve™ Rodent Birth Control is a humane solution, it can be used in conjunction with lethal methods.
